(54) Title: EMISION ENHANCING COATING, ATICLE TO WHICH THE COATING IS APPLIED AND METHOD FOR APPLYING THE COATING TO A SURFACE

WO 2005/005689 A1

(57) Abstract: The invention relates to an emission enhancing coating for a surface, which coating comprises at least one electrically conductive transparent film and at least two non-conductive films, wherein the conductive and non-conductive films have been applied alternately on top of one another. The invention further relates to an article to which a coating according to the invention has been applied. Such an article is, for instance, a solar cell, light reflector or a metal foil. The invention further relates to a method for applying an emission enhancing coating according to the invention to a surface.
